

HOPES TRAINING CAMP

Information Sheet	
Background Information	<p>The International Table Tennis Federation drives a worldwide Hopes Program aimed at detecting young talents and supervising them from the earliest stages. The process starts at national level with a training camp and tournament run early in the year. Through this, a few players are selected to follow the program at continental level and then at world level.</p> <p>TTQ has implemented a regional and state identification process. We believe that detecting kids earlier and providing them with the tools to succeed will raise the level of talent in Queensland. One of our top priorities is to develop our young players to compete at a national level.</p>
